

## 絵文字方程式による解 (怪)

ラグビーボールの部分の面積は

$$\begin{aligned}O &= 2\text{ } \square - \square \\ &= \frac{1}{2}\text{ } \square - \square\end{aligned}$$

青い部分（▼）の面積は

$$\begin{aligned} 1 &= \square - \triangle - \triangle \\ &= \frac{1}{2}\square - \frac{1}{2}\triangle - \frac{1}{12}\circ \end{aligned}$$

緑色の部分 (  ) の面積は

$$\begin{aligned}
 \triangle &= \square - \square - 4\text{□} \quad (\text{ただし、}\square = \frac{1}{2}\text{○}) \\
 &= \frac{1}{2}\square - \frac{1}{2}(\frac{1}{2}\text{○} - \square) - 4(\frac{1}{2}\square - \frac{1}{2}\triangle - \frac{1}{12}\text{○}) \\
 &= \frac{1}{12}\text{○} + 2\triangle - \square
 \end{aligned}$$

求める面積は

$$\begin{aligned}
 \text{diamond} &= \square - 4\triangle - 8\textcircled{1} \\
 &= \square - 4\left(\frac{1}{12}\textcircled{1} + 2\triangle - \square\right) - 8\left(\frac{1}{2}\square - \frac{1}{2}\triangle - \frac{1}{12}\textcircled{1}\right) \\
 &= \square + \frac{1}{3}\textcircled{1} - 4\triangle
 \end{aligned}$$

数値を代入すると

$$\text{Area} = a^2 + \frac{1}{3} \pi a^2 - 4 \frac{1}{2} a \frac{\sqrt{3}}{2} a$$

$$= a^2 (1 - \sqrt{3} + \frac{1}{3} \pi)$$
